The information in this document contains general descriptions of the technical options available, which do not always have to be present in individual cases and are subject to change without prior notice.

The required features should therefore be specified in each individual case at the time of conclusion of the respective contract.
The new Connexx 7 can do more.

Much more.

Connexx from Siemens stands for simple, fast and reliable hearing instrument fitting. The program is trusted by more than 20,000 Hearing Care Professionals worldwide. One of the main reasons: Connexx is always state of the art – each update sets new standards. For the newest version of Connexx, the proven principles of Connexx 6.5 remain and have been optimized even further. Connexx 7 is very similar to its previous version and lets you spend more time with your customer and less time learning a new software.

Better, more powerful, more convenient – this is also true of the new generation, Connexx 7. The programming software for the new Siemens micon™ hearing instruments combines the latest functionality with straightforward operation. Connexx 7 makes your workflow faster, simpler and more intuitive than ever before. It can be customized for your individual fitting process – no matter how or how much you use Connexx. But this is not all: Connexx 7 opens up new possibilities for your consultations with the Counseling Suite.

And the best thing about it: with Connexx 7 you have access to every functionality at your fingertips, a bonus for experienced users. It is also the perfect tool for new users who benefit from the simple intuitive workflow provided by the new structure.

What advantages does Connexx 7 have to offer?

• **Quick, simple programming** of the new Siemens micon hearing instruments; all new micon functions such as miGuide™ are supported. All other Siemens hearing instruments can still be fitted using Connexx 6.5.

• **Optimized workflow**: faster, straightforward navigation, direct access to all individual fitting parameters.

• **User-centered design**: fully customized First Fit defaults, screen contents and program settings.

• **New functions**: InSituGram, product details overview.

• **Optional support tool**: the new Counseling Suite.
Optimized workflow

Smoother, smarter fitting. With Connexx 7.

Connexx 7 guides you through your fitting process more easily and quickly than ever. Thanks to the new structure, comparable to the Internet and similar applications, you can access process steps at a click for a fast intuitive workflow.

Simpler, faster navigation

1. When opening Connexx 7, the first interface you encounter is the new Portal Page. From there, you can directly access the main areas with one click: "Patient List", "Audiogram", "Read Out Hearing Instrument", or "Counseling".

2. The main navigation elements are now located at the top of the screen. Using the tabs in the navigation bar, you can easily switch between the main steps in the fitting process.

3. The new secondary navigation is on the left-hand side. This enables direct access to each feature at any time, without having to click through the entire chain of menu commands.

Connexx 7 in 3 minutes: This video demonstrates how easily the software can be integrated into your own workflow with information about the new structure and improved navigation.
Connexx 7 is customizable. According to your preferences.

With Connexx 7, you can now optimize your personal workflow more freely. Important basic settings, which you regularly use for fitting, can be easily customized to fit your individual requirements.

Customizable user preferences

- Personalized Portal Page – the background image can be configured to individual preferences with just a few clicks.

- In the "Fitting" area, different parameters within the various tabs in the lower navigation bar can be configured to fit your individual requirements and preferred fitting method.

- In the "User Preferences" menu you can define your customized or default settings for First Fit, or also other standard settings.

- For customers with special audiological requirements you can modify settings at any time. A practical feature: functions are automatically reset afterwards, so you don’t need to do a thing.

- Thanks to the new Cockpit View, you can choose between two different modes in the lower navigation bar: display all 5 tabs or only the 3 most important. This way, only functions that you really need are displayed.

- The preconfiguration of your fitting process enables a First Fit with one click while still providing a complete overview – it couldn’t be simpler, quicker or more convenient.
Further new features

New functions, new possibilities. It’s all in Connexx 7.

Aside from optimized navigation and customizable application options, Connexx 7 offers you flexible options for the monitor display and a number of further functions that make your daily work easier – and help you during consultations.

Flexible screen layout

The user interface is based on the latest .NET-Technology, enabling dynamic screen displays. All visual elements such as tables, graphics, parameter views, curves and buttons are scalable and can quickly be made larger or smaller via mouse control. This enables you to change the display to fit your needs.

micon support

Connexx 7 offers the perfect support for fitting micon hearing instruments. Intuitive and flexible controls for all micon features such as frequency compression, miGuide, and tinnitus noiser are easily accessible according to your workflow needs.

InSituGram

The new InSituGram enables you to verify audiometry results directly via the hearing instrument in the customer’s ear. This makes it possible for you to effortlessly conduct and improve basic fitting – without interrupting your workflow or additional technical tools. In addition, your customer can also get used to how it feels to wear a hearing instrument even before First Fit.

Attractive product images

Images of the individual hearing instruments are available during hearing instrument selection. With a click of the mouse, you can show your customer the hearing instrument in the various color variations, as well as a cosmetic overview of the hearing instrument on the ear, and an overview of available accessories. This gives your customer an immediate visual impression effortlessly supplied by a single medium.
Competent consultation

Connexx 7 is now a comprehensive assistant. Also during consultations.

Connexx 7 is not only a more convenient fitting software, it can now also be an effective counseling tool. The Siemens Counseling Suite can now be integrated in Connexx and can support you in a variety of ways during the consultation process with your customers – before, during and after the fitting.

Practical counseling option

• Tried and tested consulting elements like the “Hearing Loss Simulator” are already well-known from Connexx and have been combined and expanded with more functions and information relevant to consulting.

• The Counseling Suite accompanies you throughout the entire consultation process – offering useful information on subjects from “Hearing and Hearing Loss” to practical tips that can help your customers adapt to their hearing instruments.
